PROFILE

I am currently employed as a Full Stack Developer at Triad Learning Systems where I have been instrumental in completing comprehensive web development projects that have resulted in a positive impact to company revenue. I am also a graduate of Washington State University where I earned a BA in Management Information Systems (magna cum laude) after attending Spokane Community College where I earned an AAS in Software Development as well as both an AA in Business and General Studies (Associate of Arts). I graduated with honors from both schools and in doing so demonstrated an aptitude for learning (or further refining) my software literacy, programming, business, customer-service and collaborative skills.

- JavaScript/jQuery
- Java (Android)
- Laravel
- MySQL
- PHP
- PostgreSQL
- Responsive Design
- Ruby
- Ruby on Rails
- SQL
- Symfony
- Visual Basic (VB)
- WordPress

EXPERIENCE

Triad Learning Systems | November 2017 - Present

During my tenure with the company I have completed a multitude of projects using AWS, Bootstrap 3/4, C#, CSS3, Docker, Git, HTML5, JavaScript, jQuery, Laravel, SQL, Symfony, and VBScript. I have maintained an exceptional level of customer service while collaborating with team members on project requirements for front-end & back-end development and have successfully met or exceeded deadlines. The projects I have completed for TLS on my own or as a collaborative effort have had a considerably positive effect on company revenue.

Freelance Web Designer/Developer | June 2013 – Present

I have put together an online resume and portfolio website that can be accessed at: **https://thisdudecodes.com**
